EDUCATION

MASTER DATA SCIENCE AND INTELLIGENT SYSTEMS
UNIVERSITY OF CONSTANTINE 2 - ABDELHAMID MEHRI

September 2023 - Juin 2025
Constantine, Algeria

BACHELORE SOFTWARE ENGINEER
UNIVERSITY OF CONSTANTINE 2 - ABDELHAMID MEHRI

september 2020 - july 2023
Constantine, Algeria

EXPERIENCE

CENTRE DES IMPOTS SETIF | STAGE SUR LE RESEAUX

Setif, Algeria | mars 2024 – avril 2024

During this period, the main objective of the internship was to provide the student with an experience of observation and learning within our organization. They had the opportunity to:

- Discover the tasks of the Information and Resources Department.
- Explore the network infrastructure that connects the library (CDI) to the national network via fiber optic.
- Learn about network equipment such as CISCO routers, switches, patch panels, etc.
- Familiarize themselves with IT equipment such as servers.
- Understand the server operating system through a virtual machine to perform tests on the system's roles and functionalities.

BOOKINGHERO INTERSHIP | FULL STACK DEVELOPPER

Remote | Februry 2025 – Mai 2025

I completed a full-stack development internship at a Danish beauty and style startup named BookingHero, where I was responsible for building and enhancing the companys digital platform. During the internship, I worked on both the frontend and backend using React.js for the user interface, Express.js for the server-side logic, and MySQL for database management. My role involved developing key features, improving performance, and ensuring a smooth and responsive user experience. This experience allowed me to apply my technical skills in a real-world environment, contribute to a live product, and collaborate with an international startup team focused on the beauty and lifestyle industry.

HAKATHON DEVFEST 2024 WINNER | BACKEND DEVELOPPER
2024

Constantine, Algeria | 9 – 11 December

- During this period, the main objective is to develop an HR management project through the dedicated hard work of team members, competing with other teams to secure first place.
- I participate as a backend developer in the team.
- we win the hakathon by a score of 60/100

WISSAL GROUP INTERSHIP | DEVOPS ENGINEER

Setif A by lgeria | Septembre 2025 – October 2025

I completed a one-month internship at Wissal Group Startup in Stif as a DevOps Engineer with the Operator Team.

I worked on the test repository for El Salam Banks project alongside operations engineers.

My main focus was containerizing services using Docker for reliable environments.

I also implemented CI/CD pipelines using GitHub Actions to automate testing and deployment.

This experience strengthened my skills in DevOps, system operations, and team collaboration.

SKILLS

PROGRAMMING LANGUAGES	Python, JavaScript, html, css
LIBRARIES/FRAEMWORKS	Django, numpy, pandas, matplotlib, React, Rest_Framework, tailwind, Next.js, Tensorflow
TOOLS / PLATFORMS	Git, Docker, VS Code, Github, Swagger, AWS, Jupyter
DATABASES	MySQL, PostgreSQL, Redis, mongodb, Sql

PROJECTS / OPEN-SOURCE

ARTISANS CONNECT | [LINK](#)

Python,Django,Docker,React,Bootstrap,Postgresql,Ec2,S3,Sklearn

Artisan Connect is a web platform that connects clients with project managers and skilled artisans for home improvement and construction services. It streamlines project planning by assigning specific artisans to services like painting, electricity, and flooring, while ensuring scheduling based on real availability. The platform uses AI models (Random Forest) to predict the time and cost of each service based on the provided project details. It also features real-time messaging between clients and managers using WebSockets, and was developed as part of a Masters final project

QARINI | [LINK](#)

React,tailwin,Django,Django Rest Framework,Groq llm

Qarini is an AI-powered educational platform that enables teachers to generate quizzes and evaluations automatically, correct them instantly using an intelligent grading system, and efficiently manage student performance. It allows private schools to track progress, organize grades in a centralized dashboard, and gain clear insights into each students strengths and weaknesses. By combining assessment automation with real-time analytics, Qarini helps improve teaching efficiency and enhances the overall quality of learning.

KITABI | [LINK](#)

Flutter,Django,Sqlite,LLM

Kitabi is an intelligent book reservation system developed during the ENSIA MOBAI Hackathon in Sidi Abdellah, Algiers, by our hackathon team. The platform enhances the traditional library experience with an AI-powered recommendation engine that detects users' interests based on their reading history and behavior, offering personalized book suggestions. Users can search, reserve, and track book availability in real time through a user-friendly interface. Kitabi combines smart technology with practical functionality to make book discovery and reservation seamless and engaging.

HR NEXUS | [LINK](#)

Django,React,Tensorflow,Sqlite

HR Nexus is a smart human resources management platform developed by our team during the DevFest Hackathon, where we proudly won first place. The system streamlines the entire HR process from automated CV screening and intelligent candidate-job matching to interview scheduling and performance tracking. Powered by AI, HR Nexus helps companies make faster, smarter hiring decisions while reducing manual workload. With a secure, user-friendly interface and role-based access control, it provides an efficient and scalable solution for modern HR teams.

UNICORE | [LINK](#)

Django,React,Rest-Framework,Mysql

Unicore is a university stock and resource management platform, developed as part of my final Bachelors project. The system is designed to help universities efficiently manage their materials, equipment, and inventory across various departments and facilities. With features such as stock tracking, request and approval workflows, inventory reporting, and resource allocation, Unicore ensures better transparency, control, and optimization of university assets. The platform provides an intuitive interface for both administrative staff and department managers, making it a practical solution for modern university operations.

CERTIFICATIONS

- Software Engineer Bachelor - University of Constantine 2 abdelhamid mehri..
- AWS Academy Cloud Developing - **AWS ACADEMY**
- AWS Academy Cloud Foundations - **AWS ACADEMY**
- Supervised Machine Learning: Regression and Classification - **DEEPLARNING.AI**

- Data Science and Intelligent system Master - University of Constantine 2 abdelhamid mehri..
- Advanced learning algorithms - **COURSERA**

HONORS & AWARDS

- DevFest constantine 2024
- Backend Workshop Sallon dinformatique constantine 2025
